

## Program Elements for Kingman and Heritage Islands

### Island Remediation

- Removal of invasive and non-native plant material
- Clean up and removal of all rubble and garbage
- Re-Grading and capping of certain areas dependent on proposed use
- Extensive and comprehensive reforestation plan using native plant material
- Protect and enhance existing wildlife habitats

### Security

- New fence along Benning Road and RFK Stadium parking lot entrance - gates to close at dusk except for special events
- Police / Urban Ranger patrol and sub-station at Nature Center
- Lighting - security lighting at entrance, nature center, and select locations

### Bridge(s)

- Reconstruction of two existing bridges connecting Kingman and Heritage Islands to RFK Stadium parking lot (currently under construction)

### Nature Center

- Information / Education
- Outdoor Classroom
- Office / Ranger Station
- Observation Deck
- Restrooms

### Service Road and Service Parking

- Gravel road connecting Benning Road to Nature Center - for service, emergency vehicles and special event drop-off. Minimal parking to be provided at Nature Center for service and handicapped access

### Trail System

- Bike and Pedestrian Path - 'small mile' crushed stone path for bike and pedestrian use to access the core area - handicap accessible, graded and maintained
- Pedestrian Path - walking and jogging path - handicap accessible, graded and maintained path for pedestrians only
- Nature Path - crushed or natural hiking and walking trails through wooded areas

### Signage

- Vehicular and pedestrian signage and wayfinding system to announce approach to island, island information and uses.

### Playground

- Environmental adventure playground
- Several age groups

## KINGMAN & HERITAGE ISLANDS: PREFERRED MASTER PLAN CONCEPT
